ALISON STRUTH 3944 49 AVE DRAYTON VALLEY AB T7A 1E5 Account Number XXX XXX 397 Reference Number TB1924 8091 1423

Dear Madam:

Re: Notice of Determination

We are writing about your daughter Molly Struth's eligibility for the disability tax credit (DTC).

We have completed our review and determined that Molly is eligible for the DTC for 2006 and future years. You may be entitled to claim the disability amount on your income tax and benefit return for some of those years.

Please note that only adjustment requests for tax years ending in any of the 10 calendar years before the year you make the request can be considered. For example, a request made in 2019 will be accepted only for 2009 and later tax years.

Please do not send us another Form T2201, Disability Tax Credit Certificate, unless we ask for one.

Since you are claiming the disability amount for a dependant, you must inform us if he/she is no longer residing with you, or if you are no longer supporting him/her in one or more of the basic necessities of life (e.g., food, shelter, or clothing).

Note: Support that does not relate to providing the necessities of life, such as visiting the dependant each day, providing moral support, preparing a meal, doing the person's laundry, and/or shopping, does not entitle an individual to request the transfer.

The disability amount is a non-refundable tax credit that reduces the amount of tax you owe. If the total of the credit is more than the amount you owe, no refund is issued for the difference.

To whom it may concern,

Re: Molly Struth DOB: 01-Jan-2005 PHN: 458448471

Please see below pertaining to her application.

Molly is well known with juvenile idiopathic arthritis.

Disease onset was in 2006. Since then she has developed bilateral hip deformity due to joint erosion and pathology. She has lost a great deal of her hip joint mobility with worsening bilateral hip pain due to this.

She became markedly restricted in mobility in 2014.

This significantly impacts her mobility and causes her regular pain as well as emotional distress.

She will unfortunately require surgery on her hips in the future, once skeletal maturity has been achieved.

Molly requires significant ongoing medical monitoring and treatment and has to travel for regular follow up appointments at the Alberta Children's Hospital at least once to twice a month.

Please feel free to let us know if any other information is required

Sincerely,

Lealet Van Staden, MBChB (covering for Dr J Giddey)
